Environmental Policy

Environmental policy

FFM are committed to the continual improvement in environmental performance to protect the environment for the benefit of our clients, employees and the communities in which our businesses operate.

We will as a minimum ensure that all our activities are undertaken in full compliance with current environmental legislation. We will respect the environment in which we operate, whilst maintaining commercial viability and long term profitability.

Specifically we will:-

- Identify all of our environmental aspects and impacts as part of our business operation.
- Allocate management resources for the affective direction and implementation of the environmental policy with the aim of achieving objectives.
- Develop and measure our performance through a programme of annual audits.
- Ensure that waste is reduced, reused and recycled were practicable.
- Ensure that energy is used efficiently and consumption monitored.
- Encourage, support and favour where commercially practicable, those suppliers who can show their products are derived from sustainable sources and who operate within appropriate ethical standards.
- When selecting supplier and contractors, take account of their environmental and ethical credentials.
- Encourage all employees to participate in improving environmental performance.
- Provide all employees with appropriate information and where necessary training and instruction on environmental and ethical issues.
- Carry out environmental risk assessments as part of the due-diligence process.
- Undertake work in a manner that seeks to minimise the visual, noise and any other adverse impacts on the local environment.

This policy will be monitored to ensure that it is effective and will be regularly reviewed and revised as necessary.

Signed on behalf of FFM services

Darren Cook
